

## **John Favreau**

John has been creating and maintaining his own small business websites for the past 15 years. He holds a degree in Computer Information Systems, however, he is self-taught in HTML programming. He finds HTML coding to be fairly intuitive and to be an outstanding means of not only marketing a small business but also for channeling the creative process. He believes that anyone can learn this skill even without any prior programming experience.

John currently designs and maintains the website for The Long Branch School of Maine at [www.longbranchschool.com](http://www.longbranchschool.com). John is one of the founding partners in the business.
